

PORT-A-MAST™ Solutions

OMJC Power Plant™

Solar powered batteries for a quiet, efficient and green power source!

» Our Solution to You

The OMJC Power Plant™ is just like it's name, it provides AC power to remote locations or the work zone. Specifically designed to replace line power when none is available. Reduce your costs of the installation and usage of line power!

» No Fuss Batteries/Solar

700 watts of solar panel power charge up to 10 AGM batteries. Absorbed Glass Mat lead acid batteries are a no fuss, no maintenance technology take will provide you 10 years of superior use.

» Replace your Generator

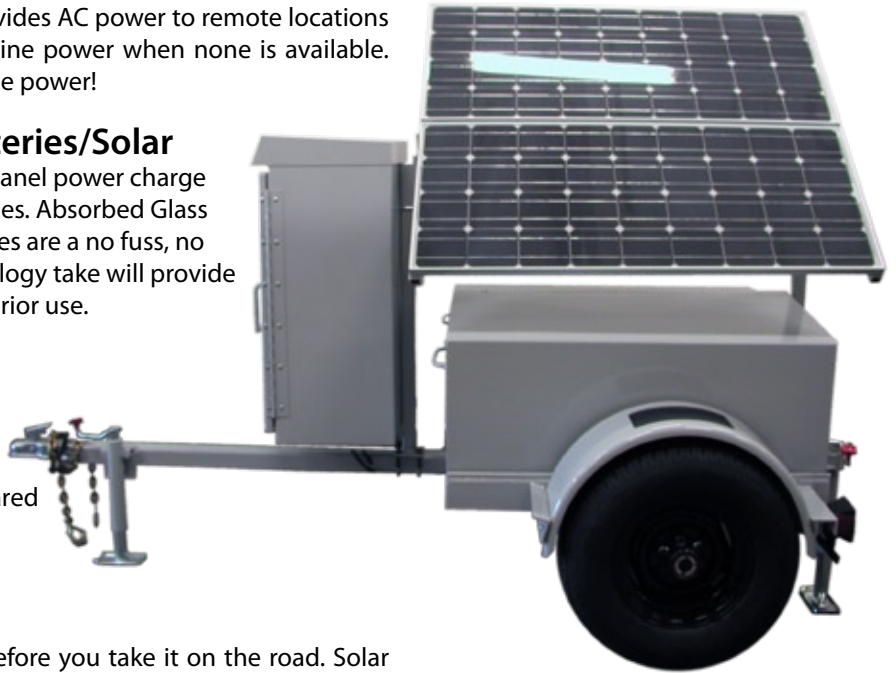

Face it, your diesel-fueled generator is noisy, expensive to power, and is an antique compared to the environmental advantages of solar power.

» Charge, Haul, and Enjoy

Our AC inverter plugs into any outlet to charge before you take it on the road. Solar energy is capable of producing 3-8 KW Hours of power per day with a reserve of 20 KW Hours (within the batteries) for the duration of your deployment.

This trailer tows in tandem and can deploy over uneven terrain with optional jacks and stabilization. With a 2nd hitch included, tow more than one when you need double the power. The two panel solar units are adjustable up to 360°.

The OMJC Power Plant™ has a small footprint making it easy to maneuver and store, even in your garage. All of our equipment is powder-coated and can withstand up to 70 mph wind loads.
